

## **HLP 2016**

This summary provides important information about the registration of your stallion(s) for one of the stallion performance tests, held in 2016. For more detailed information, please look at the 2016 Guidelines for Stallion Performance Tests.

### **New testing methods and admission requirements as of 2016**

Detailed information on the new HLP testing methods, valid as of 2016, such as conditions for admission, requirements, procedure and judged features, determination of results etc. will be available for each testing method with the [2016 HLP-Guidelines](#).

### **Minimum quantity of registrations, execution resp. cancellation of tests**

Execution of the offered tests depends on the sufficient number of registrations. Depending on the number of registered stallions, the test will be released resp. cancelled at the registration deadline (four weeks before the date of the test) and the applicants will be informed by email. Provided the minimum number of registrations has not been reached and the test has to be cancelled, all affected applicants shall have the opportunity to re-register their stallion(s) at the same fee for another test.

Minimum number of registrations:

- 14-day disposition test: 20 stallions
- 50-day stallion performance test: 20 stallions
- sports test for stallions – focus dressage: 10 stallions
- sports test for stallions – focus show jumping: 10 stallions
- sports test for stallions – focus all-round disposition: 5 stallions

Please click on „Availability“ to check how many of the maximum number of registrations are still available (example: 34/40 -> 34 of max. 40 stallions are already registered).

### **Fees**

It is possible to cancel a registration free of charge until registration deadline. Registrations maintained beyond registration deadline are considered firm, and a cancellation free of charge shall not be possible any more.

#### **New:**

As of 2016, the testing fee for non-delivered stallions shall be forwarded to the corresponding stallion testing station to compensate loss of profit. After expiry of the first registration deadline, administrative fees shall remain, as is usual, with the FN (see 2016 HLP Guidelines, BI5 and BII 5).

### **Late registration**

There are late registration periods for already released tests for late deciders. Please consider that higher fees will be charged for tests marked „Late registration“.

### **Clear graphics and press releases**

Graphics, featuring possibilities to accomplish the performance test (HB I-entry) for stallions and current press releases are available with „General information“.
